

WEINOR ACCESSORIES

Outdoors is homely

MORE COMFORT FOR YOUR OUTDOOR AREA

Sometimes it's the little things that make a beautiful place perfect. When gentle light brightens the evening, the sun does not glare or it remains pleasant even when it gets cooler, real comfort is created. With well-thought-out accessories for awnings, terraces roofs and Glasoasen[®], you can design your outside exactly as it feels right for you.

VARIOSHADE VALANCE

**COMPLEMEN-
TARY PRIVACY
AND GLARE
PROTECTION**

If the sun falls obliquely on the terrace or curious glances disturb the mood, additional protection from the front is needed. Protection that is there when you need it, but discreetly hidden at other times.

The VarioShade Valance from weinor can optionally be integrated into the drop profile, which forms the front closure of the awning. It is elegantly integrated into the overall awning design there. The vertical shading can be controlled by a gear handle or conveniently at the touch of a button using the same hand transmitter that operates your awning.

The patented weinor Opti-Flow-System® to support the fabric roll of the VarioShade Valance ensures reliable closure of the drop profile and optimal fabric position – even with large widths.

screens by weinor®
Fabric collection for vertical window and patio privacy and sun protection

VARIOSHADE VALANCE

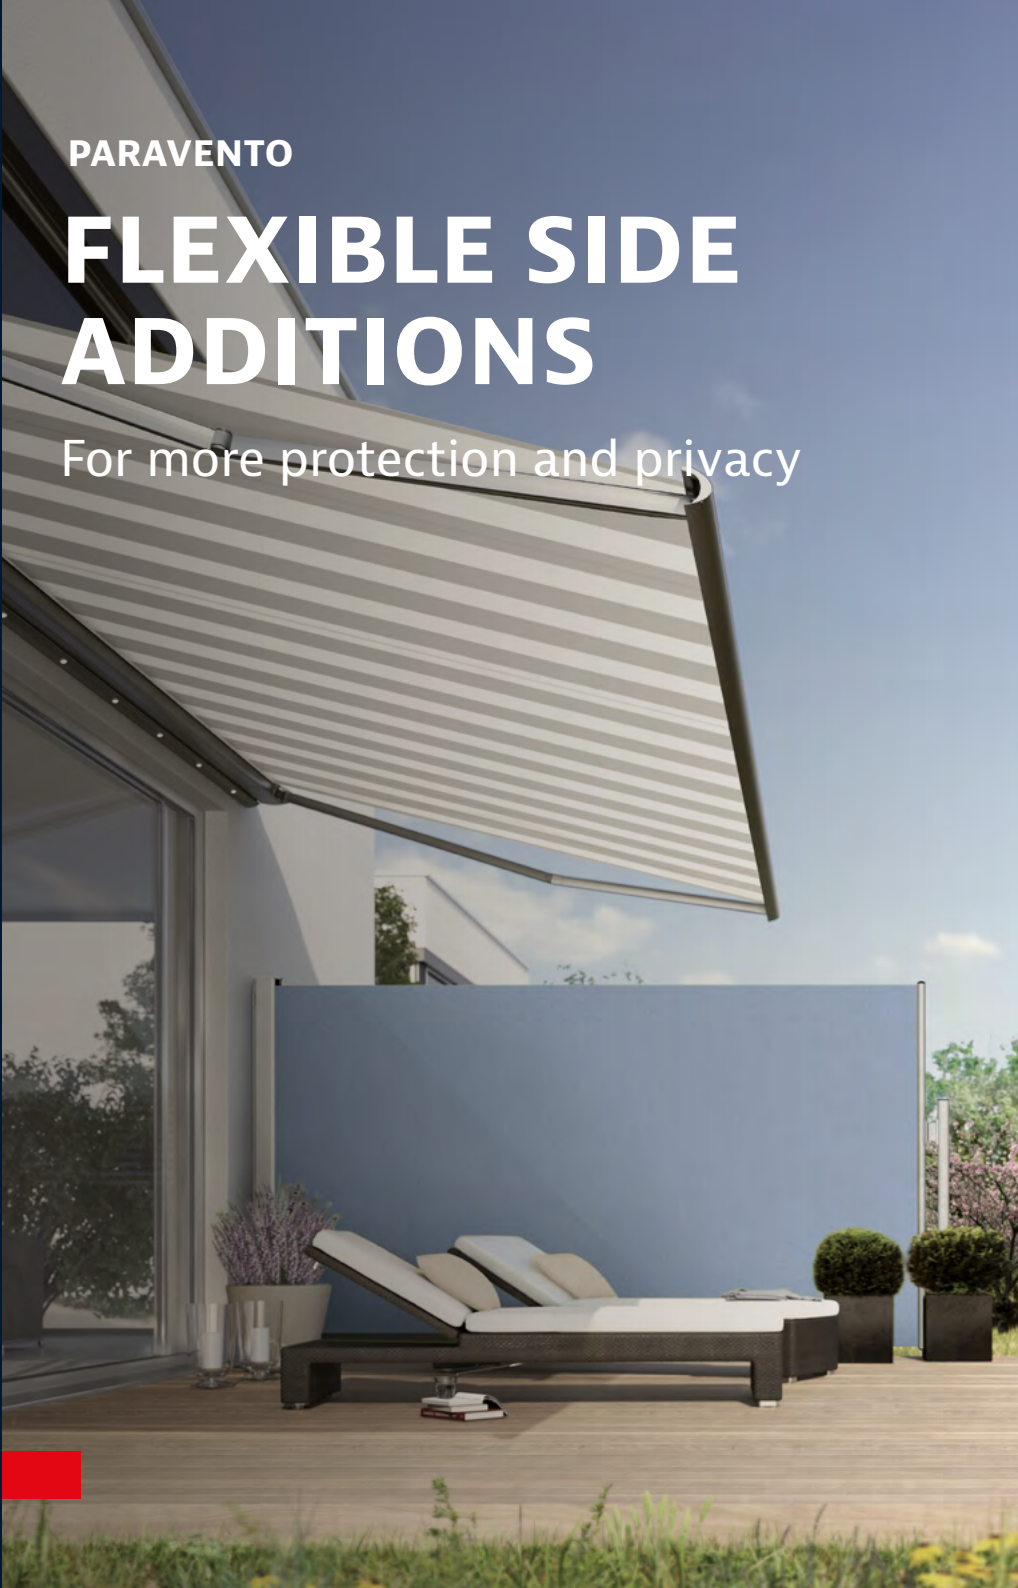

A summary of your benefits

- ✓ Optional for weinor Opal Design II, Smaila, Semina Life and Plaza Viva awnings
- ✓ Glare protection and privacy protection up to a maximum valance height of 2.1 m
- ✓ Plaza Viva: VarioShade Valance canopy with solar and crank drive possible
- ✓ Folding arm awnings: motor drive as standard, gear drive possible (only recommended with small systems)
- ✓ Smaila optional with solar module on the drop profile
- ✓ Steplessly extendable
- ✓ Fabrics in numerous high-quality patterns and different materials to choose from the my collections and screens by weinor® collections
- ✓ Practical control – via weinor BiConnect even with table retraction protection

PARAVENTO

FLEXIBLE SIDE ADDITIONS

For more protection and privacy

That is special

Discreetly hidden in the cassette,
quickly pulled to the side.

The stylish Paravento side awning shelters you from curious onlookers, sunlight and fresh side winds. As a cost-effective solution, the lean but robust cassette can be mounted practically anywhere. The Paravento creates attractive highlights in combination with a state-of-the-art pattern from the weinor fabric collection.

Special function fabrics provide privacy protection from the outside during the day and still allow you to see outside. Therefore, the Paravento is a flexible and elegant alternative to fixed elements such as fences, walls and hedges.

PARAVENTO

A summary of your benefits

- ✓ Beautifully shaped cassette for perfect fabric protection
- ✓ Can be extended and retracted in one step
- ✓ Special functional fabrics with outward visibility from the screens by weinor® collection and fabrics from my collections 2 can be used
- ✓ Version with angled top edge of fabric possible for ideal combination with weinor folding arm awnings

That is special

Freestanding double awning with two identical weinor awnings – for large shaded areas without fixed building anchorage.

Duofix creates generous shade in open areas – independently of existing facades or supporting structures. As high-quality weinor awnings are fixed to both sides of the free-standing system. This creates a textile double awning with an impressive span, under which even larger groups can find comfortable space.

Duofix is available in versions with the Opal Design II cassette awning or the Opal Design II LED, the Topas II with roof, and the Plaza Viva pergola awning. The stable, durable construction can be dismantled if necessary – ideal for seasonal use or changing locations.

DUOFIX

A summary of your benefits

- ✓ For use on free-standing areas
- ✓ Possible to integrate weinor heating system and LED lighting
- ✓ Max. width 6.5 m, also row installations feasible
- ✓ More than 200 frame colours available

DUOFIX

**THE TEXTILE
PERGOLA AWNING**

A photograph of an outdoor patio area. In the foreground, two white, sheer curtains hang from the top, framing the view. The patio floor is made of light-colored stone tiles. In the middle ground, there is a dark-colored outdoor sofa. Beyond the patio, there is a large, rectangular infinity pool that reflects the sky. The background shows a vast, hazy landscape of rolling hills and mountains under a bright, overcast sky. The overall mood is serene and modern.

OUTDOOR CURTAINS

GENTLE BORDERS. CLEAR EFFECT.

Textile elements for more privacy, shade and
homely accents under your patio roof

OUTDOOR CURTAINS

A summary of your benefits

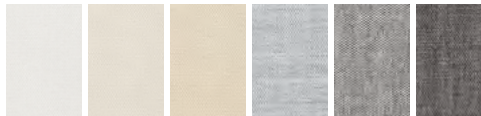

- ✓ Weather-resistant outdoor fabrics
- ✓ Six colour variants (Collection Summer Dream)
- ✓ In addition to terrace and louvre roofs
- ✓ Laterally movable
- ✓ Individually positionable
- ✓ Guide rail made of high-quality powder-coated aluminium
- ✓ Stable castors for easy opening and closing
- ✓ Carabiner hooks and eyes made of high-quality stainless steel
- ✓ Sideways frame (Optional)

Outdoor curtains give your terrace a new dimension. They create protected areas without closing off the space and provide pleasant shading when the sun is low.

The light textile moves in the wind, filters views and gives the outdoor area a homely atmosphere. This creates zones in combination with glass elements for retreat and relaxation - flexible and changeable at any time. Multiple tracks can be individually positioned, giving you the opportunity to create new spatial effects time and again.

That is special

Six noble colour variants to choose from in the Summer Dream collection.

A modern glass-enclosed outdoor living space, likely a sunroom or conservatory, featuring a wooden deck and a pond. The structure is made of frameless all-glass elements with smooth sliding technology. The interior is furnished with a blue sofa and a dining table. The exterior is surrounded by lush greenery and flowers. The scene is set during the day, with sunlight reflecting off the glass and water.

W17 EASY

FRAMELESS ALL-GLASS ELEMENTS WITH SMOOTH SLIDING TECHNOLOGY

Open Protected? Always flooded with light.

That is special

Frameless all-glass elements with smooth sliding technology.

W17 EASY

A summary of your benefits

- ✓ weinor all-glass elements
- ✓ Smooth sliding function
- ✓ Partially or fully open
- ✓ Reliable protection against wind and rain.
- ✓ Seamless integration into the patio roof
- ✓ System solution for the Glasoase®

w17 easy extends your patio roof for maximum transparency. Frameless all-glass elements can be easily slid to the side and open up the space as needed – completely or partially.

Closed, they offer reliable protection against wind and driving rain, without restricting the view outside. This is how the character of your terrace is preserved: open, flooded with light and flexibly usable.

WEINOR GLASOASE®: A ROOM OF GLASS AND LIGHT

The weinor glass patio roofs, the textile patio roof weinor PergoTex II as well as the louvred roof Artares can be extended with w17 to create a Glasoase®. This creates a transparent enclosed outdoor space on your terrace, which exudes both freedom and security – open to the eye, flexible in use and harmonious in architecture.

Make your patio roof into a
weinor Glasoase®

HEATING SYSTEMS

COMFORTABLE WARMTH FOR MORE TIME OUTSIDE

You extend your precious time on the patio with the weinor Tempura and Tempura Quadra heating systems. They can be mounted anywhere, are easy to retrofit and generate pleasant warmth. The infrared rays can be felt as soon as the system is switched on. The heater is available in a round version as well as the Tempura Quadra with square design.

www.tuv.com
ID 1000000000

Tempura and Tempura Quadra are developed and produced in Germany.

TEMPURA QUADRA

Modern cubic design

Tempura Quadra is the square design of the Tempura with compact housing.

TEMPURA

Round shaping

The round version of the Tempura impresses with its classic look.

INFRARED TECHNOLOGY: EFFICIENT AND PLEASANT

The Tempura/Tempura Quadra running costs are significantly lower than with conventional

In comparison to electrical quartz heaters, the weinor infrared heating technology only warms up the skin and not the air in between.

Resulting in maximum heat emitted straight after they are switched on.

Tempura Quadra technical data

Output	1,500 watts*
Power supply/frequency	230 V/50 Hz
Filtered light	Up to 99%, extremely low-glare
Heating technology	Infrared radiation, instant heat
Control units	weinor BiConnect/Somfy
Wired control unit	on site/various manufacturers

Tempura radiant heaters are suitable for exterior areas which are protected against the elements. If several units are installed adjacent to one another, the individual fluorescent spotlight colours may vary slightly. A quiet humming sound may be perceived from the radio control, as is common from other electrical appliances.

* Two Tempura can usually be connected with a standard household 16 amp fuse.

TEMPURA/TEMPURA QUADRA

A summary of your benefits

- ✓ Instant heat without any delay thanks to infrared technology
- ✓ 91% efficient due to the concentrated radiation thanks to strong reflectors
- ✓ Can be retrofitted at any time to complement existing weinor products or even for other patio systems
- ✓ Can be used virtually everywhere or mounted directly onto weinor Opal Design II (Tempura and Tempura Quadra) and Semina Life (just Tempura) awnings
- ✓ More than 200 frame colours available
- ✓ Finely adjustable dimming via BiConnect or Somfy io-homecontrol® radio control – Optionally with a smart home app

A photograph of a modern terrace at dusk. A purple awning covers the area, with integrated LED lighting strips visible along its edge. The terrace is furnished with a sofa and a chair, and a small table with a lit candle is in the foreground. The background shows a modern building with large glass windows.

LIGHTING

LIGHT CREATES ATMOSPHERE

When daylight fades, a new quality of being outdoors begins.

With the lighting solutions from weinor, you can extend your time on the terrace and create an atmosphere that combines security, comfort and architectural impact - discreetly integrated or flexibly complemented.

CALM LIGHT. INVITING EFFECT.

LED spotlight:

(Terrazza Originale, Terrazza Semptra, Cassita II, Topas II, I/K/N 2000, Semina)

A steady sequence of warm points of light carries the room through the evening. The light is soft, connecting and creates a pleasant basic brightness for conversations, encounters and relaxed hours. The spots are combined in a clear light bar and are mounted under roof racks or directly under the awning – also possible afterwards.

LED SPOTLIGHT:

A summary of your benefits

- ✓ Spots bundled in an integrated light strip
- ✓ Installation possible under roof racks or under the awning
- ✓ Also retrofittable
- ✓ Pleasant warm white light (approx. 3,000 K)
- ✓ Finely adjustable dimming via radio (BiConnect or Somfy io-homecontrol®)
- ✓ Extremely efficient lighting with low energy consumption

GENTLE BEAM OF LIGHT. SPECIAL ATMOSPHERE.

Integrated LED spotlights

(Kubata, Opal Design II, Semina Life, Smaila, Plaza Viva, Sottezza, weinor PergoTex II)

Warm light cones create atmospheric accents under your awning or pergola. They gently structure the space, make areas appear lively and create depth without dominating. The high-power LED spots are directly integrated into the cassette or crossbars. Special glass lenses provide a clearly defined, pleasantly soft light effect.

INTEGRATED LED SPOTLIGHTS

A summary of your benefits

- ✓ Directly integrated into cassette or transom
- ✓ Clearly defined light beams through special glass lenses
- ✓ Pleasant warm white light (approx. 3,000 K)
- ✓ Finely adjustable dimming via radio (BiConnect or Somfy io-homecontrol®)
- ✓ High durability (up to 30,000 hours of illumination)
- ✓ High-power LED spotlight lighting

STAGING WITH LIGHT.

Integrated LED lighting

(Terrazza Pure, Terrazza Pure MAX, Artares)

A continuous line of light traces the architecture and gives the roof a clear, modern presence. Warm white creates elegant restraint, coloured light creates a completely unique, ever-changing atmosphere – from subtle to expressive. The integrated LED light strips run precisely along the construction and provide a uniform, flat lighting effect. Dimmable and energy-efficient, they combine design and comfort.

LIGHT BECOMES A MOOD SETTER

With freely selectable colours, the atmosphere of your terrace changes in an instant – from subtle accent lighting to expressive staging. Gentle colour gradients or clear shades set targeted highlights and emphasise architecture, furniture or plants.

The RGB LED strip light is flexible to use and complements weinor OUTDOOR REALMS with individual colour accents. Due to the identical powder coating, it integrates harmoniously into your system. The coloured light is conveniently controlled by radio.

INTEGRATED LED LIGHTING

A summary of your benefits

- ✓ Available as warm white base light or colour LED strip (ambient light)
- ✓ Colour LED strips with a wide colour selection
- ✓ Pre-assembled in roof racks, optionally also integrable in posts
- ✓ Plug-in ready, weatherproof and visually protected integrated cabling
- ✓ Synchronised control in colour and brightness
- ✓ Clear, minimal integration without visible technology

RGB LED LIGHT BAR

A summary of your benefits

- ✓ Beautifully-shaped cassette, can be fitted flexibly and subtly
- ✓ Extremely efficient lighting with low energy consumption
- ✓ Variety of shades selectable, depending on the control system
- ✓ Can be installed anywhere protected from the weather, can also be retrofitted
- ✓ Finely adjustable dimming with radio via weinor BiEasy remote control; on-off function also via wall switch

A modern outdoor patio area featuring a pergola with a wooden deck. The pergola has a dark metal frame and is illuminated with warm, recessed lighting. The deck is furnished with a light-colored sofa and a coffee table. The patio is adjacent to a house with a light-colored brick exterior and large glass doors. The scene is set during dusk, with a soft orange glow in the sky. The overall atmosphere is warm and inviting.

ACCENT LIGHT

ATMOSPHERICALLY STAGED LIGHT AND SPACE

Light transforms spaces. With the LED accent light, you can set targeted light points - on the patio roof, on the facade or in the garden. This creates atmospheric accents that emphasise both architecture and atmosphere equally.

The modern LED technology provides a warm light effect, makes your evenings outside cosy and works particularly energy-efficiently. Due to the identical frame colour, the lamp integrates harmoniously into the overall appearance of your setup – timeless in design, durable in quality.

The light can be conveniently switched and dimmed via remote control. The position is flexible – on the post, on the wall or in a corner position. An upgrade can also be easily implemented.

ACCENT LIGHT

A summary of your benefits

- ✓ Sets targeted light accents on the terrace roof, on the house facade or in the garden
- ✓ GU10 lamp socket for warm white or coloured standard bulbs
- ✓ IP 65 protection rating – suitable for outdoor use
- ✓ Includes: weinor BiConnect and Somfy io-homecontrol® radio controls
- ✓ Varied control options incl. external GU10 light bulbs
- ✓ Wall, corner or pole mounting possible
- ✓ Available in frame colour matching the weinor product
- ✓ Simple installation and retrofitting

THE RIGHT CONTROL UNIT FOR ALL NEEDS

By cable, radio or smart home, using a hand transmitter, smartphone, automatic weather control or pre-programmed: with our variety of controls, you can not only operate your weinor sun protection effortlessly, but also the lighting and heating – or all connected smart home devices.

CABLE, RADIO, SENSORS AND SMART HOME:

For more convenience and safety

Weinor offers different technologies to operate its awnings and accessories conveniently. Some products are still available with the classic gear. However, it is much more comfortable to control your sun protection by motor.

If you only want to operate an awning with a motor drive, a wired control unit with a wall switch suffices. It becomes more challenging when the lighting and heating are also to be activated. Control per remote hand transmitter then makes operation with several stationary commutators superfluous.

Control however, wherever and whenever you like

If you want even more convenience, you can integrate your radio-controlled units into a smart home system. They can be connected to other devices using a smart home box and controlled by a smartphone, tablet or voice assistant.

WEINOR CONTROL UNITS:

A summary of your benefits

- ✓ Operation as required
- ✓ Different options for motorised awnings
- ✓ Up to 15 devices can be controlled by one hand transmitter
- ✓ Can be combined with automatic weather control
- ✓ Possibility of Smart Home integration

WHICH CONTROL UNIT FITS YOUR NEEDS?

Choose your level of convenience.

Manuell ★

Manual

You'd like to operate your awning manually and under your own steam? With a gear handle, it does not need a power connection and can be installed very flexibly almost anywhere.

Recommendation

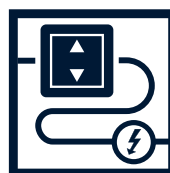

- For small dimensions
- If no automatic control is required
- If there are definitely no plans to add accessories

Benefits

- Can always be operated manually (even in the event of a power failure)
- Does not need a power connection

Expandability

- Cannot be expanded (automatic)

Basis ★★

Basic

You wish to operate your awning conveniently using a switch. Your motor-driven awning is extended and retracted easily by a wired connection. Automatic control with sun, wind and rain sensors can be used alternatively instead of a manual switch.

Recommendation

- If the switch is in an easy to access position
- If no remote control is required
- For awnings without lighting (as not dimmable)

Benefits

- Can always be operated from a fixed location
- Easy operation with no exertion of force

Expandability

- Automatic control possible
- Can be connected to smart switches or wired control systems*

* The technical feasibility must be determined on an individual basis on site by a retailer.

Comfort

Would you like to control your weinor awning comfortably by remote control? It's pretty easy with a remote control. The lighting and radiant heater can be activated and even dimmed with it. Accessories such as the Valance Plus or other awnings can also be controlled centrally by remote control.

Recommendation	Benefits	Expandability
<ul style="list-style-type: none"> – For practical and fast operation from your garden chair – Automatic weather control possible – For awnings with lighting (dimnable) 	<ul style="list-style-type: none"> – Not tied to a fixed position for operation – Easy operation with no exertion of force – Can be retrofitted with other remote controls 	<ul style="list-style-type: none"> – Automatic control possible – Can be combined with other products from the same control system – Expandable for connection to a smart home system

Smart

Would you like to connect your weinor awning, lighting, radiant heater, or other accessories to other devices in your home and control them from anywhere by smartphone or tablet? It's child's play with the Somfy TaHoma Switch smart home centralised control! And even possible using voice control or preset automated scenarios.

Recommendation	Benefits	Expandability
<ul style="list-style-type: none"> – For maximum flexible control from any location – For voice control – If automatic weather control is to be integrated 	<ul style="list-style-type: none"> – Many different control options regardless of location and time – Simply intuitive operation, e.g. by smartphone with status feedback – Automatic scenarios, such as if-then sequences 	<ul style="list-style-type: none"> – Many other devices can be integrated – For networking with other devices in the home – Can be combined with other products from the same control system

Why we recommend the convenience option?

With radio-based devices, you have maximum convenience on your patio and at the same time the possibility of having your awnings, plus accessories, integrated into a smart home system at a later time (currently only products with Somfy remote receivers).

RADIO TECHNOLOGY

for convenience on your patio

Would you like to activate the awning, patio lighting or heating system at the press of a button from your lounge? Then radio control is not only a simple and convenient solution, it also impresses with its good value for money.

Radio control is particularly recommended for weinor patio products, which can also be controlled from outside. Even weather sensors can be integrated here, which automatically react to sun, wind or rain and open or close the awning.

VarioShade Valance

LED lighting

Tempura heating system

Somfy or BiConnect weather sensors

Motorised weinor awning

Radio systems and receivers are available from weinor BiConnect or Somfy Smart Home Ready. Both systems cannot be combined with one another.

REMOTE CONTROLS

A summary of your benefits

- ✓ Convenient to operate without getting up
- ✓ No wired switch required
- ✓ Up to 15 devices can be controlled by remote control, depending on the system
- ✓ With secure routing technology, depending on the system
- ✓ Fixed control panel with wireless wall-mounted transmitter possible
- ✓ Smart home compatible, depending on the system

HAND AND WALL-MOUNTED TRANSMITTER

Safe, simple and comfortable

weinor BiConnect hand and wall-mounted transmitters

BiEasy 15 M Go!

- Controls up to 15 weinor products
- Display and LED display feedback
- Extracts and retracts the awning, switches and dims lighting or heating
- RGB-optimised for dimming and setting colours

BiEasy 1 M and 5 M

- Controls up to 5 weinor products
- Extracts and retracts the awning, switches and dims lighting or heating
- LED display feedback

BiEasy wall-mounted transmitter, 1MV-3V

- Controls one weinor product
- LED for transmission control

Somfy Smart Home Ready hand and wall-mounted transmitters

Ysia 16 Patio io Anthracite

- Controls up to 16 weinor products
- Up, Down and Stop key
- Sun automatic adjustable
- "my" favourite position (e.g. ideal position for shade)
- Controls for coloured LED strips

Situo 5 Variation A/M io Pure II

- Controls up to 5 weinor products
- Extracts and retracts the awning, switches and dims lighting or heating
- RGB-optimised for dimming and setting colours

Smoove 1 io Pure Shine wall-mounted transmitter

- Controls one weinor awning

SMART HOME YOUR INTELLIGENT HOUSE.

Somfy's smart home system lets you integrate your weinor awning, conservatory sun protection, lighting and patio heating. Making your life much easier.

You can not only control all your Somfy Smart Home Ready equipment. Smart home also helps you save energy, because automatic sun protection provides pleasant shade and helps reduce air conditioning costs.

Or you can make it look like someone is living in your home while you're on holiday: the vertical awnings close at a certain time every day and the light in the house goes on – for more security when you are not at home.

BiConnect

YOUR TERRACE TECHNOLOGY UNDER CONTROL

Control unit with Smart Home box and app

With the TaHoma Switch smart home centralised control, all radio-based devices, in addition to awnings, patio heating and lighting, can be connected together – for example, roller shutters, door locks or surveillance cameras. By connecting them to voice assistants such as Amazon Alexa, Apple Home Kit or Google Assistant, you can also really conveniently operate your weinor awnings and accessories by voice control too.

Even more convenience using the app

The Somfy TaHoma app allows you to control your networked constructions by smartphone or tablet and to check their current status – even when out. Personalised scenarios can also be defined and various devices can be connected to one another in automated processes. For a cosy holiday atmosphere, for example, your pergola awning automatically extends when dusk falls and the patio lighting switches on.

Note: When purchasing your remote control-based constructions, ensure that they are equipped with the right remote-controlled motor. This allows their integration at a later stage and networking with other smart devices in the same system – a future-proof solution.

SMART HOME:

A summary of your benefits

- ✓ Integration into home control systems
- ✓ Networking with other building technology devices
- ✓ Control by smartphone from anywhere and anytime
- ✓ Voice control

WEATHER SENSORS

WELL EQUIPPED WITH WEATHER SENSORS

On sunny days, south-facing and west-facing patios often heat up quite a lot. And it can get unpleasantly hot in the living areas behind them. Of course, you can't always be there to extend your sun protection in good time. Weather sensors from weinor or Somfy are a clever solution here.

PROTECTION AGAINST THE SUN, WIND AND RAIN

The sun sensors are activated when the sun reaches a certain intensity. They automatically extend the awning and create pleasant shade. When it starts raining or when wind picks up, wind and rain sensors automatically close your sun protection again. Special product protection sensors protect your awning from too much vibration, for example in gusts of wind.

That is special

- Automatically retract and extend the awning depending on the weather
- LED status display for all weinor BiSens weather sensors except the product protection sensor
- Depending on the version, with power connection, battery or solar operated

weinor BiSens (weather sensors)

Combined sun/wind/rain sensor

- Automatically opens the awning in sunny conditions and retracts it in wind and rain
- with power connection

Sun/wind sensor

- Automatically opens awning in sunny conditions and retracts it in windy conditions
- with power connection

Solar sun sensor

- Automatically opens awning in sunny conditions and retracts it in windy conditions
- battery operated

Product protection sensor

- Retracts the awning when vibrations and movements are detected (e.g. gusts of wind) – with table retraction protection
- battery operated

Somfy io-homecontrol (weather sensors)

Wind sensor

- Automatically retracts the awning in winds
- battery operated

Sun sensor

- Automatically opens the awning in sunny conditions
- battery operated

Product protection sensor

- Retracts the awning when vibrations and movement are detected (e.g. gusts of wind)
- battery operated

ARCHITECTURE & MOOD

Each slotted hole has "its own" application: Good sun and weather protection emphasises it instead of covering it up. Colours, shapes and materials influence how your outdoor space feels: Frame colours create calm accents or clear contrasts, while cloths filter light and give shadows their own colour effect. Everything can be tailored specifically to the facade, windows, and the style of your house – harmoniously integrated or deliberately accentuated. This creates a coherent overall picture that provides protection and creates atmosphere.

AWNING FABRIC

COLOUR, PROTECTION AND ATMOSPHERE

Awnings shape the atmosphere on your terrace. Colour and texture determine how the light works, how soft shadows fall and what mood your outdoors receive. Depending on the material, a bright, open lightness is created or a protected, pleasantly shaded area where you can relax and enjoy the day.

The high-quality materials combine this effect with long-lasting quality. This is how places are created where protection and atmosphere come together – for many beautiful moments outdoors.

That is special

Long-lasting bright colours - because the fibres are not just dyed on the surface, but completely dyed through (like a carrot).

my collections 2

Large selection of awning fabrics for awnings under glass and on glass – for solutions which match the architecture, atmosphere and your personal style.

Pergona®

Special waterproof fabrics for the textile patio roof (weinor PergoTex II). Optionally almost opaque or translucent for more light transmission.

screens by weinor®

Technical screen-woven fabric for vertical sun protection. Reduce heat and glare whilst simultaneously providing an outdoor view.

EXPERIENCE YOUR FAVOURITE FABRICS LIVE

Order your favourites directly to your home. Original samples show how colour, structure and light effect work in your personal environment.

Find your individual fabric under:
www.weinor.com/awning-fabrics

FRAME COLOURS

INDIVIDUAL AND HARMONIOUS

With over 200 frame colours, weinor offers you almost unlimited design possibilities.

Whether tone-in-tone with the facade and fabric or deliberately contrasting – you decide what suits you.

All colours are applied using high-quality powder coating processes in our own factories in Germany and are particularly durable, UV-resistant and easy to maintain. This keeps your stylish outdoor area permanently beautiful.

47 standard RAL colours

Uniform colour – guaranteed

Careful processing ensures that colours and gloss levels of all your products match exactly – even with later additions or retrofits.

9 trend colours

Choose from an abundance of high-quality colours:

- 47 standard RAL rack colours, silk gloss
- 9 scratchproof, resistant trend colours with an elegant textured look
- Over 150 special RAL colours

Colour manufacturers make every effort to guarantee colour stability. Despite this, as a result of the ban on the addition of heavy metals, it therefore cannot be fully excluded that in particular the colour flame red (RAL 3000) may fade during the course of time.

Further information about our world of colour is available here:
www.weinor.com/architecture-mood

That is special

Sealed all around. Permanently protected. Thanks to premium powder coating from weinor – without open cut edges, without corrosion.
